Subject: [WARNING: SPF validation failed] RE: Supplemental comments regarding Gunnison Copper Project Class III Draft Underground Injection Control Permit

The Arizona Mining Reform Coalition provided a canned message for me to send.

I have dumped that message and will give you one that is short and to the point. I am a native Arizonan and I have seen great changes in the landscape and climate of this state in my 60 years. I can say without hesitation that WATER IS MORE VALUABLE TO OUR STATE THAN COPPER.

That statement is coming from a registered Republican.

These guys can make money some other way but once that water is poisoned, it can never be used again.

Respectfully yours,
Brian Calkins
